### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

the prior art of record does not suggest or disclose the claimed combination of method steps or circuit elements, most particularly,

as per independent method claim 1:

the predetermined current sequence is selected so that as the differences of the successive sensed voltages developed across the two sensing nodes in the current path are being combined, the cumulative effect, in the sensed voltages, of voltage components resulting from series resistance in the current path between the two sensing nodes through the device is minimized [sic], and

the number of times the device is subjected to excitation by the excitation currents during the predetermined current sequence is selected so that the effect of the voltage components resulting from the series resistance in the current path between the two sensing nodes in the determined voltage indicative of the temperature of the device is substantially eliminated. [emphasis added]

and, as per independent circuit claim 28:

a control circuit for controlling the first switch circuit for applying the excitation currents to the device in a predetermined current sequence so that the successive sensed voltages developed across the two sensing nodes in response to the excitation currents in the predetermined current sequence is such that as the differences of the successive sensed voltages are being combined in the integrating circuit, the cumulative effect, in the sensed voltages, of voltage components resulting

from series resistance in the current path between the two sensing nodes through the device is minimised [sic], and

controlling the number of times the excitation currents are applied to the device in the predetermined current sequence so that the effect of the voltage components resulting from the series resistance in the current path between the two sensing nodes in the determined voltage indicative of the temperature of the device is substantially eliminated. [emphasis added]

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
